

Basic Acro and EMT No Not Emergency Medical Tech

It's easy to start Acro flying and learn Emergency Maneuver Training. This, just might be an invitation addressed to you! Everyone will benefit from this morning; but the focus will be aimed toward the experienced pilot who now wants to know a little more about sensing a potential accident, and how best to fly their plane if something does go wrong. We'll cover how to go about spreading your wings a bit, in order to best enjoy some EMT and /or some ACRO training.

Directions: Enter the airport area at the Osborne St. main entrance near the intersection of Osborne and San Fernando Road. Plenty of free parking. Drive to far end of lot near Airport Manager's office.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
